[For full grant announcement and contact information click here](#)

Synopsis: The program seeks to fund innovative projects that help youth with disabilities develop the leadership and employment skills they need to succeed, particularly for careers in science, technology, and the environment. MEAF defines youth from birth through college (about 26 years of age). The foundation will also consider projects to create tools that help break down barriers to employment and increase job opportunities for young people with disabilities entering the workforce, including returning veterans with disabilities.

Eligibility: Grants will be provided to nonprofit organizations in the United States with 501(c)(3) status for projects that present an innovative approach leading to measurable employment outcomes for youth with disabilities. Projects should be national in scope or have a definite plan for national dissemination and replication; should promote the full-inclusion of youth with disabilities alongside their peers without disabilities; and should promote inclusive competitive employment practices. Preference is given to projects that take place in Mitsubishi Electric community locations or involve Mitsubishi Electric Employee Volunteers.
